Experience

- **Accenture** Jan 2024 - Present
Software Development Engineer
 - Collaborated with cross-functional teams to ensure seamless integration of software components and systems.
 - Participated in regular code reviews, offering constructive feedback to peers while refining personal coding techniques for continuous improvement opportunities.
 - Increased code quality and maintainability through the implementation of best practices and design patterns.
 - Streamlined development processes for enhanced productivity by implementing Agile methodologies.
- **Tata Consultancy Services (TCS)** Nov 2021 - Jan 2024
Backend Developer
 - As a Backend Developer at TCS, I have 3+ years of experience in developing, testing, and maintaining software applications using agile methodologies
 - One of my key achievements at TCS was to significantly reduce the runtime and costs for SQL queries, cutting them from 5 seconds to 2 seconds, for the HxGN EAM application, which helps manage assets and maintain inventory in warehouses
 - I also designed and implemented a PL/SQL script to automate manual data entry, resulting in a 50% increase in productivity
 - I have collaborated with other team members to investigate alternate design approaches and build design prototypes, and I have received multiple awards for my outstanding contribution and teamwork

Projects

- **Yelp-Camp Website**
YelpCamp is a full-stack website project where users can create and review campgrounds.
 - Everyone can view the camps and see reviews without signing up or logging in.
 - Users can create, edit, and remove campgrounds
 - The user can only edit/delete the campgrounds and comments that they have added.
 - Users can review campgrounds once, and edit or remove their review.
 - All the data will be persistent and is stored in the cloud.

Skills

- MongoDB
- JavaScript
- NodeJS
- Express.js
- Python
- RESTful APIs
- HTML/CSS
- IoT
- Bootstrap
- REACT

Education

- **Aligarh Muslim University** 2020
Bachelor of Technology (B. Tech.)
